REPORT:

7/5/17: Received a call from CeCe Sellgren of CCC Clean Water Program. She received a call from Stephen Pree of the City of El Cerrito regarding a release of a white substance (possibly paint?) into the area of Cerrito Creek adjacent to the El Cerrito Plaza. I contacted Mr. Pree. He requested that the Haz Mat Team help with the clean-up of the impacted area of the creek. The City of El Cerrito had laid down a coffer dam to reduce further impact of the creek downstream.

A. Ackerman was already out in the field and was dispatched directly to the incident location. She arrived at 12:16 pm and made contact with Mr. Pree.

A. Springer and S. Heller departed from the office in HM1/6824 to the incident location and arrived on scene at approximately 12:44 pm. A tailgate meeting was conducted prior to any mitigation actions by CCHSHMP to discuss safety and tactical considerations. Springer and Heller assessed a sample of the white substance in the creek to be pH neutral and not an oxidizer. Dissolved oxygen was 7.8-8.1 upstream, mid-stream, and downstream of the contained release. Also, wildlife (e.g., insects, fish) in the creek appear to be unaffected by the release. The white substance may be a combination of water-based paint (possibly latex) and joint compound.

CCHSHMP tried to remove the material; but it appeared that the material had dried up, making it difficult to be removed/separated from the creek substrate of sand and gravel. CCHSHMP departed from scene at 13:16 pm.

Additional Required Items: Bill of Lading, Request for Invoice, and Site Safety Plan
